In his latest book, The Songs of Trees, biologist David Haskell reveals the intricate labyrinth at which trees are the centre. No tree has ever, in its ecology, its genetics, its relationship with humans, been alone. It moves through life as this incredibly connected being. It’s made from connection. Over the course of many years, he has repeatedly visited a dozen trees around the world, listening to them and exploring their connections with the world around them. Haskell shows that this networked view of life enriches our understanding of biology, human nature and ethics. When we listen to tr... Song of the Trees is a 1975 story by author Mildred Taylor and illustrator Jerry Pinkney. It was the first of her highly acclaimed series of books about the Logan family. The novella follows the time Mr. Anderson tried to cut down the trees on the Logan family’s land. The story revolves around Cassie Logan who tries to save the trees on her Big Ma's land. Even though Cassie's family needed some money, something told Cassie the trees were just as valuable. The Songs of Trees is a book of noises. A balsam fir tree in northern Ontario hisses in the wind like fine steel wool burnishing a tabletop, a sound that is strong, corrosive but with a soft bite. By contrast, the needles of a ponderosa pine in the Colorado Rockies are so stiff and unbending that even a small gust creates a sound like a huge landslide. This time Haskell expands his view to 12 trees over time in different parts of the world. In addition to the ceibo, fir, pine, ash and pear, these include: a sabal palm on a barrier island in the American state of Georgia; a hazel that is more than 10,000 years old and now exists as bits of charcoal in an archaeological facility in Scotland; a cottonwood sapling in a Denver park that is repeatedly reduced to wood chips by.
