Modern disciplinary silos tend to separate the fields of classical philology and theology. This collection of essays, however, explores for the first time the deep and significant interactions between them. It demonstrates how from antiquity to the present they have marched hand in hand, informing each other with method, views of the past and structures of argument. The volume rewrites the history of discipline formation, and reveals how close the seminar is to the seminary. Aa. Aa. Studies in Philology considers for publication articles on British literature through Romanticism and articles on relations between British literature and works in the classical, Romance, and Germanic languages. The journal rarely publishes essays focused exclusively on literature other than British. The editorial readers for Studies in Philology include, in addition to the Editorial Board, members of the graduate faculty of the departments of languages and literatures in the University of North Carolina.
