Book lovers will no longer have to rely on their imaginations to picture the scene of novels set in Wales thanks to a new website. Literary Atlas plots locations in stories set around the country, allowing readers to explore some of the places integral to the plot. Researchers from Cardiff and Swansea universities studied hundred of novels to form the interactive guide. Literary Atlas also plots the main geographical locations of all English-language novels in the Welsh collections of Cardiff University, Swansea University, and the National Library of Wales. One key location was taken from each of the 558 novels, giving users a broad overview of the relationship between a story's plot and the place it is set in. Dispute over official book sales figures. 'Distinctive voice' scoops Dylan prize. This book has been written as an aid to learning Welsh. It is a Celtic language originating in Wales (Cymru), but is now only spoken by around a quarter of the Welsh population, as English has started to become the norm. It is also spoken in the Welsh settlement in the Chubut Valley of Patagonia, Argentina. There are also speakers of Welsh throughout the world, most notably in the rest of Great Britain, the United States, Canada and Australia. Although coming from Wales, the large majority of the Wales is famous for its amazing little narrow-gauge railways, but it also has some full-size trains, too. One of the most popular tourist lines is the Heart of Wales Line that runs from Shrewsbury to Swansea, one line that visits two viaducts, three castles, four spa towns, five counties, six tunnels and seven bridges. Dolau, six miles to the northeast of Llandrindod Wells, is the best starting point on the line to walk to the top of Radnor Forest, the highest point in the old county of Radnorshire. At the heart of the farm is a Welsh longhouse, a traditional building developed over many centuries from a wooden cruck-framed medieval hall. In an 18th century stone barn opposite there are exhibitions on both the longhouse and the surrounding wildlife.
