Optimized Library Assistant

An Undergraduate Research

Presented to

The Faculty of Computer Studies Department
De La Salle University – Dasmariñas
Dasmariñas, Cavite

In Partial Fulfillment
of the Requirement for the Degree
Bachelor of Science in Computer Science

by:
Francisco, Janice N.
Jimenez, Johnson R.
Rojas, Daisy S.

March 2002
# TABLE OF CONTENTS

**APPROVAL SHEET**

**ACKNOWLEDGEMENT**

**DEDICATION**

**TABLE OF CONTENTS**

**ABSTRACT**

### Chapter 1.0: Introduction 1-1

1.1 Background of the Study 1-1

1.2 Statement of the Problem 1-2

1.3 Objective of the Study 1-3

1.3.1 General Objective 1-3

1.3.2 Specific Objectives 1-3

1.3.3 Project Deliverables 1-3

1.4 Significance of the Study 1-4

1.5 Scope and Limitation 1-4

1.6 System's Methodology 1-5

1.6.1 Methodology: Fourth Generation Technique (4GT) 1-5

1.6.1.1 Tools Included in the Fourth Generation Technique 1-6

1.6.1.2 Advantage of Fourth Generation Technique 1-7

1.6.1.3 Merit of the current state of 4GT approaches 1-7

1.6.2 Method of Data Collection 1-7

1.6.3 Method of Analysis 1-8
# Chapter 2.0: Review of Related Literature

## 2.1 Researched Literature

1. **A Computerized Borrowing System for Aklatang Emilio Aguinaldo**
2. **Philcor Library-Information System**
3. **Rodriguez Library Information System (RLIS)**
4. **Mary Immaculate Parish Special School (MIPSS)**
5. **Computerized Borrowing System for Imus Institute High School Library**

## 2.2 Conceptual Literature: Fourth Generation Language (4GL)

1. **Forms Generators**
2. **Report Generators**

---

# Chapter 3.0: The Existing System

## 3.1 Current System Overview

## 3.2 Administrative Set-up

1. **Book Borrowing Process**
2. **Book Returning Process**
3. **Computation of Fine Process**
4. **Payment of Fine Process**
5. **Generating of Report Process**

## 3.3 System Coverage

1. **Inquiry**
2. **Book Searching**
3. **Book Borrowing**
4. **Returning of Borrowed Books**
5. **Clearance**
3.4 System Inputs
3.4.1 Borrower's Card
3.4.2 Author's Card
3.4.3 Borrower's Account Receipt
3.4.4 Library Inventory Receipt Report

3.5 System Outputs
3.5.1 Library Inventory Report
3.5.2 Borrower's Account Receipt

3.6 Problems and Difficulties with the Current System

Chapter 4.0 The Proposed System
4.1 Description

4.2 Scope of the Proposed System

4.3 System Objectives

4.4 System Justification

4.5 System Design
4.5.1 System Inputs
4.5.1.1 Login table
4.5.1.2 Borrower table
4.5.1.3 Book table
4.5.1.4 Transaction Table
4.5.1.5 Book Author Table
4.5.1.6 Book Major Topic Table
4.5.1.7 Book Subject Table
4.5.1.8 Book Copies Table

4.5.2 Processes
4.5.2.1 User Log in
4.5.2.2 Searching Process 4-4
4.5.2.3 Borrowing of Book Process 4-6
4.5.2.4 Returning of Book Process 4-6
4.5.2.5 Generating Report 4-7

4.5.3 Outputs 4-7
4.5.3.1 Registered Borrower Report 4-7
4.5.3.2 Registered Reference Report 4-7
4.5.3.3 Unreturned Book Report 4-7

4.6 Database Design 4-8
4.6.1 Book Major Topic Table 4-8
4.6.2 Borrower Table 4-8
4.6.3 Book Copies Table 4-8
4.6.4 Book Table 4-9
4.6.5 Book Subject Table 4-9
4.6.6 Book Author Table 4-9
4.6.7 User Table 4-9
4.6.8 Transaction Table 4-10

4.7 Architectural Design 4-11

Chapter 5.0 Summary, Conclusions and Recommendations 5-1

APPENDICES

BIBLIOGRAPHY

CURRICULUM VITAE
Saint Augustine School has an increasing population of students every year; by which, the School's Library is having a hard time because the process of borrowing and returning of books are done manually, aside from the fact that references are not organized and categorized.

With this situation, it is better to make a system that would help both librarian and borrowers for faster and easier access of the books. It is designed based on the specifications identified to meet the objectives of the study. It is made to be user-friendly because of its Graphical User Interface.

The proponents also include a search mechanism for easy retrieval of books, registration process and security for prohibiting unauthorized users from accessing the system.
Modern Library Management Software using JavaFX. Contribute to afsalashyana/Library-Assistant development by creating an account on GitHub. Material Design Library Management Software using JavaFX. This is a library management software developed using JavaFX programming language. The entire development video with explanation of each and every part (in realtime) is available in my YouTube Channel Genuine Coder Youtube Channel. New Features. The Media Library Assistant provides several enhancements for managing the Media Library, including: The [mla_gallery] shortcode, used in a post, page or custom post type to add a gallery of images and/or other Media Library items (such as PDF documents). MLA Gallery is a superset of the WordPress [gallery] shortcode; it is compatible with [gallery] and provides many enhancements. Library Assistants aid librarians in the management and operation of a library. Their primary duties include helping customers locate books, checking books in and out at the front desk and shelving books according to their categorization. Library Assistants aid librarians in the management and operation of a library. Their primary duties include helping customers locate books, checking books in and out at the front desk and shelving books according to their categorization. Special Offer.
